SAFETY SYSTEMS SEMINAR

Why you
can't
afford to
miss this
event

01

Strengthen Your Skills

No matter your skill level, you'll learn new techniques and tools at the annual Safety Systems Seminar.

02

Stay Current

Our industry is changing faster than ever, with new products and techniques continually evolving. The Safety Systems Seminar is designed to keep you ahead of the curve.

03

Learn from the Experts

It's rare to have so many PV and Safety Suite experts together in one place that can provide an Argus education, discuss other safety platforms, and are open to answering your questions.

04

Make Valuable Connections

The Safety Systems Seminar is a great way to learn what industry peers are experiencing, including techniques, tools and best practices.

About Safety Systems Seminar

Culture

The Safety Systems Seminar's user-centric approach, with a focus on an in-depth Argus education and insights into the current regulatory landscape, is a vendor- and sales-pitch free zone. In addition to "Ask the Experts," questions are encouraged throughout the program.

Content

Speakers at the Safety Systems Seminar include Subject Matter Experts (SMEs) with deep expertise in Argus, including SME's that were the original architects of the software prior to its acquisition by Oracle. In addition, each Safety Systems Seminar offers a changing lineup of industry speakers that share experiences on practical application of technology and other relevant topics.

Community

Safety Systems Seminar brings together people that share similar experiences and challenges in a collaborative environment that enables the exchange of ideas and encourages dialog.

Connections

Re-engage with former contacts and initiate new acquaintances – the Safety Systems Seminar provides numerous opportunities during the 2+ day program to network with your peers.

Whether you are currently using Argus, thinking about it, or considering other technologies, **this meeting is for you!**

Typical attendees include:

- Chief Medical Officer
- Global Head of Safety
- VP/Head of R&D IT
- VP/Director/Manager Drug Safety Systems
- VP/Director/Manager PV Operations

Not currently using Argus?

In the pharma industry, changes are occurring at a rapid-fire pace. Your organization may have been evaluating several platforms and considering a shift in the not-so-distant future, whether due to internal changes or M&A activity. The Safety Systems Seminar can help you evaluate and select the best technology.
