

LEARN. CONNECT. IMPROVE.

Enhance what you do today. Stay in touch with tomorrow.

Why You Can't Afford to Miss This Event

Since 2014, Safety Systems Seminar (formerly called Argus User Group) has provided an in-depth education into timely and relevant safety suite topics with actionable insights and practical tools that can be applied within an organization of any size. Strengthen your skills, stay current with the industry, learn from experts, and make valuable connections.

Culture

The event's user-centric approach, with a focus on an in-depth safety systems education and insights into the current regulatory landscape, is a vendor- and sales-pitch free zone. In addition to the popular "Ask the Experts" session, questions are encouraged throughout the program.

Community

This event brings people together that share similar experiences and challenges in a collaborative environment that enables the exchange of ideas and encourages dialogue.

Content

Speakers include Subject Matter Experts (SMEs) with deep expertise in Argus, including SME's that were the original architects of the software prior to its acquisition by Oracle. In addition, each Safety Systems Seminar offers a changing lineup of industry speakers that share experiences on practical application of technology and other relevant topics.

Connections

Re-engage with former contacts and initiate new acquaintances – by networking with your peers during the 2+ day program.
